2.4GHz wifi drops while 5GHz keep working. - [Solved]

2020/05/25

Hello all! I have a dual band router MyNet N900. For some reason at time 2.4GHz band stop connecting to internet while 5GHz keep working fine. Anyone have any idea what could that be? On the computer connected via 2.4GHz i can ping the router but not connected to internet. More: If i logging into my router using 5GHz connection and change 2.4 channel it starts working....for some time, day or so...then hangs again.
